PRESIDENTIAL ADDRESS

A MESSAGE FROM THE PRESIDENT OF MALAYSIAN PHOTOVOLTAIC AND SUSTAINABLE ENERGY INDUSTRY ASSOCIATION (MPSEA)

“Twenty years on, we are no longer building an industry — we are leading one.”

As MPSEA celebrates two decades of service to Malaysia's clean energy sector, we launch the R.A.C.E to Zero Series with renewed clarity of purpose: **to accelerate nationwide renewable energy adoption, deepen industry capability, and cement Malaysia's position as a competitive force in ASEAN's fast-growing clean energy economy.**

This series marks a defining moment for our association, and for the country. R.A.C.E to Zero is an intellectual property owned by MPSEA, co-produced with our strategic partner The CO_Lab, and supported by Ministry of Energy Transition and Water Transformation (PETRA). Together, we have built a national and regional platform where **real business opportunities emerge, transformative partnerships form, and industry grows with confidence.**

From Kuala Lumpur to Johor, Penang, Sarawak, and Sabah, this series carries the clean energy message to every major economic corridor of Malaysia, running all year round and making us the only platform capable of bringing people together across the entire nation. It will spotlight the most advanced technologies, connect our members with buyers, investors, and policymakers, and ignite the conversations that move markets.

On behalf of MPSEA, I extend a personal invitation to every company local and international to be part of this movement. The decade ahead belongs to those who show up today.

Join us as we shape Malaysia's clean energy future together.

Ir. Justin Sim (D.S.M)

President of Malaysian Photovoltaic And Sustainable Energy Industry Association (MPSEA)

A MESSAGE FROM THE ORGANISING CHAIRMAN

Dear Distinguished Guests, Partners, Sponsors, Speakers and Participants,

It is with great pleasure and gratitude that I welcome you to the R.A.C.E to Zero Summit 2026. Your presence reflects a shared vision to an electro-technology revolution for Malaysia that is powered by Renewable Energy.

This summit gathers cross industry minds, communities and experts. We will turn ambition into real progress. Each conversation, and business match carries the potential to create lasting impact far beyond these halls.

I would like to express my sincere appreciation to all our sponsors, supporting organisations, speakers and delegates whose trust and dedication have made this summit possible. Your support is a powerful reminder that when we work together, progress becomes achievable.

To all attendees, I hope this summit inspires new perspectives towards a Sustainable World that we all want.

Thank you for being part of this important journey. Together, we create a better tomorrow for generations to come whether in Malaysia, regionally or globally.

Samuel Soon

Organising Chairman of R.A.C.E to ZERO Summit & Treasurer of Malaysian Photovoltaic And Sustainable Energy Industry Association (MPSEA)

A WORD FROM THE ORGANISER

“ We built this platform to turn ambition into bankable action, and to position Malaysia as the deal-making heart of ASEAN's energy transition. From the corridors of power to the factory floor, every city, every stage, and every conversation is deliberately designed to close the gap between policy and project. transforming bold commitments into real, financeable outcomes. This is where strategies become contracts, introductions become investments, and vision becomes velocity.”

“GSC is honoured to support MPSEA in launching the RACE to Zero Summit, bringing together industry leaders and changemakers to accelerate the transition towards a low-carbon future.

As a close partner, we believe this initiative plays a vital role in strengthening regional collaboration across Southeast Asia. This year is also particularly meaningful as MPSEA celebrates its 20th anniversary — a milestone reflecting two decades of sustainability leadership. We look forward to contributing to impactful conversations that will shape a more resilient and sustainable future for the region.”
